

# Polarion 설치 가이드

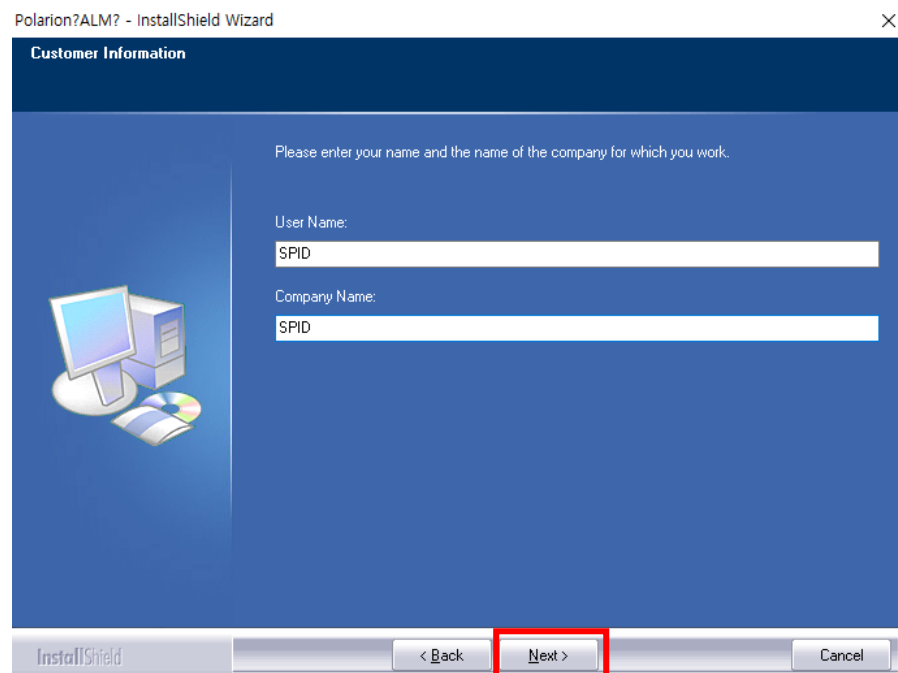

사전에 OpenJDK 11 version 필요

## 1. Polarion 설치

 PolarionALM\_18.3\_x64

Next

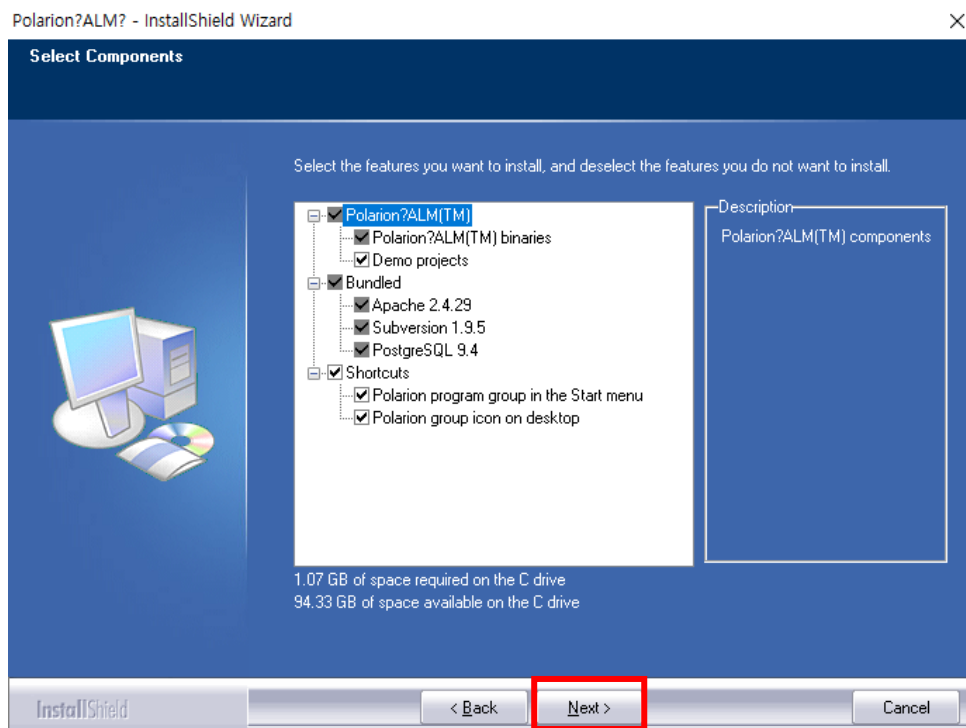

User Name, Company Name 입력

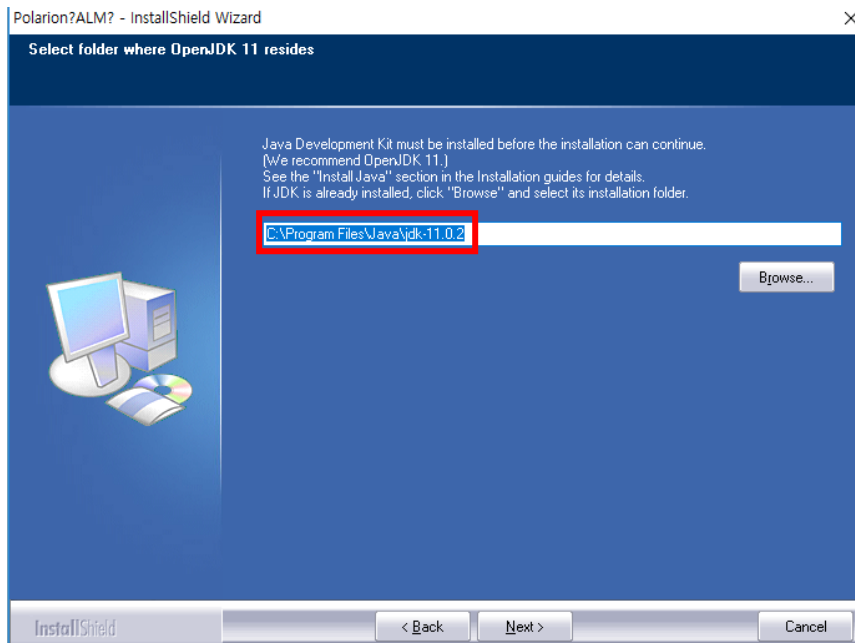

Standard Installation 체크

Destination Folder 지정

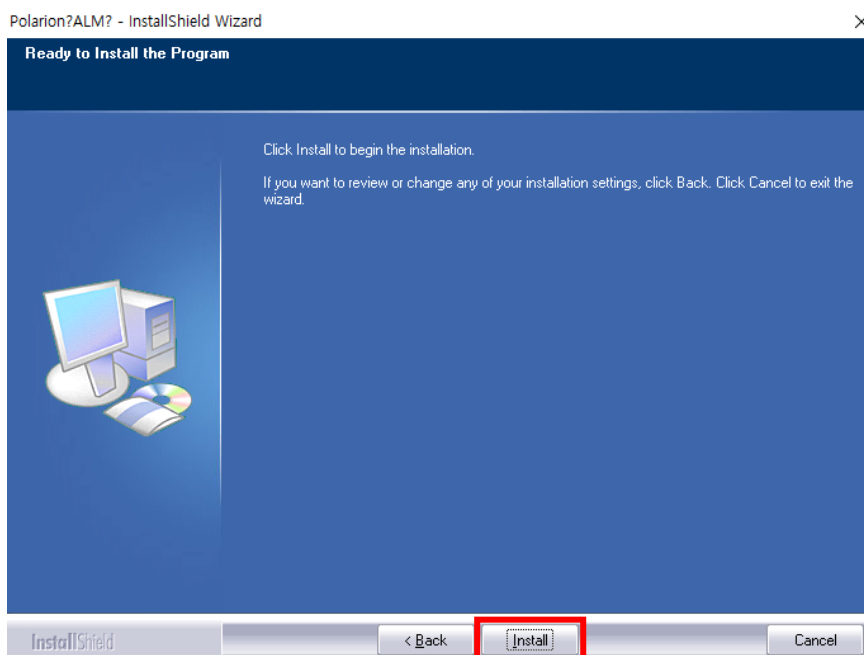

Default는 C:\Polarion으로 D:\WPolarion으로 지정

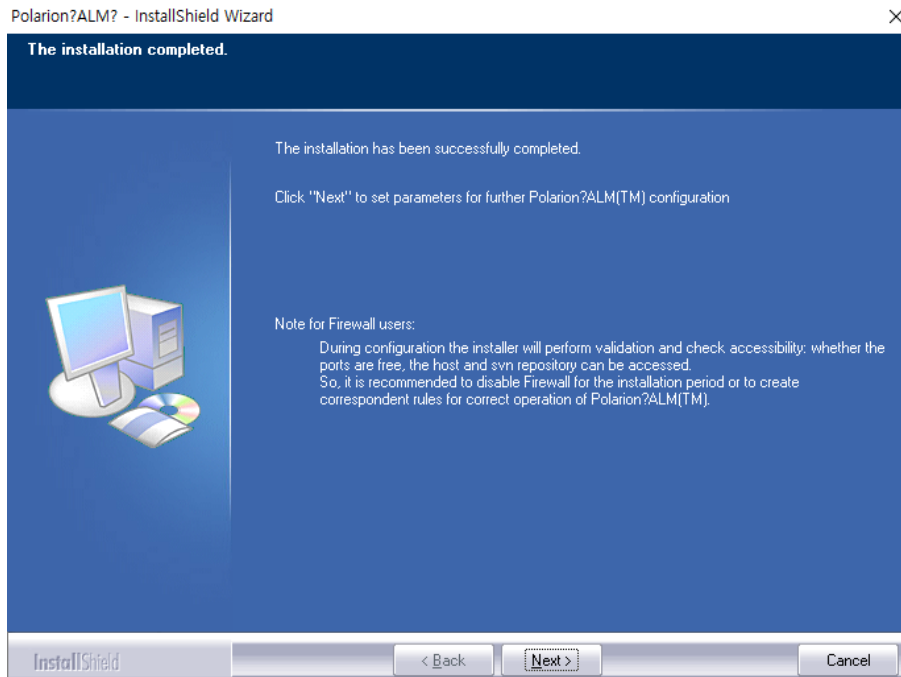

Next

OpenJDK가 설치되어 있으면 자동으로 해당 경로를 찾습니다.

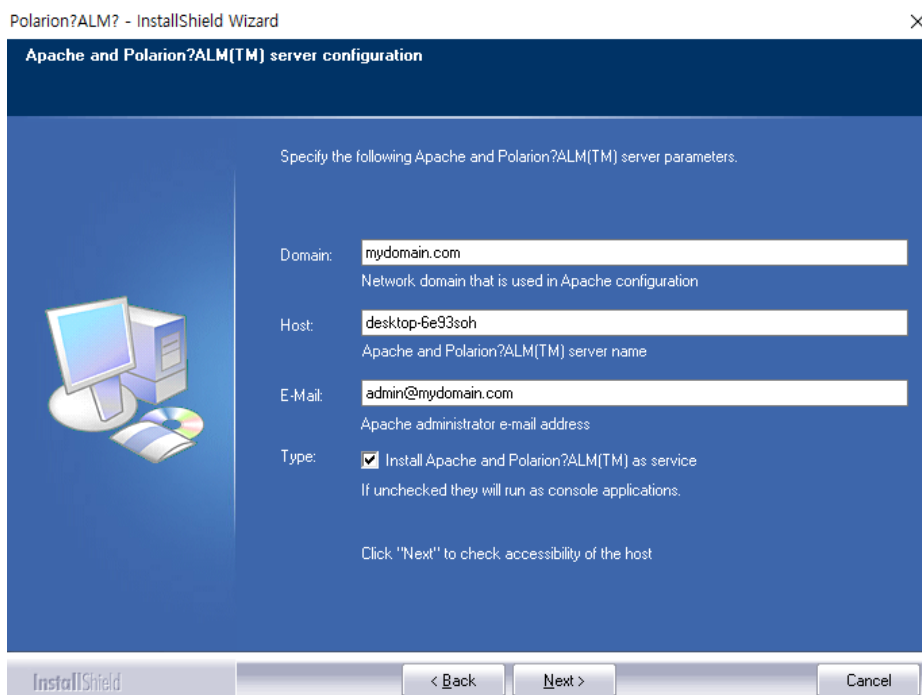

Install

여기에서 Next로 넘어가지 않고 아래와 같이 수행하고 Next

설치 패키지에 Postresql\_update 폴더에 있는 bin, lib 두개의 폴더를 D:\WPolarion\bunled\postres 경로에 bin, lib에 overwrite 합니다.

도메인 정보가 있으면 입력합니다.

설치 후 'Polarion.properties'에서 변경할 수 있으니 Next해도 무관

Polarion?ALM? - InstallShield Wizard

Apache and Polarion?ALM(TM) server configuration.

Please choose ports. The default settings are suitable for most computers.

HTTP port: 80  
The port on which Apache web server will run

JK2 port: 8089  
The port for communication between Apache and Polarion?ALM(TM)

Shutdown: 8087  
The port where Polarion?ALM(TM) will listen for local shutdown requests

Click "Next" to check accessibility of the ports

InstallShield < Back Next > Cancel

Port 설정

Polarion?ALM? - InstallShield Wizard

Specify PostgreSQL version 9.4 settings

Specify PostgreSQL version 9.4 settings

Port: 5433

Password: ●●●●

Retype password: ●●●●  
Password for the 'polarion' user which will connect to the database.

InstallShield < Back Next > Cancel

**Polarion?ALM(TM) configuration**

Specify Polarion?ALM(TM) SMTP settings

SMTP server:

You can find SMTP server address in your email client settings.  
If incorrect SMTP server is given, the Polarion? ALM(TM) will operate correctly, but the email notifications will not be delivered.

☐ Use SMTP Authentication

Account name:

Password:

Retype password:

InstallShield

SMTP 설정은 설치 후 'Polarion.properties'에서 변경할 수 있으니 Next

**Configuration summary**

The summary of configuration parameters is given below

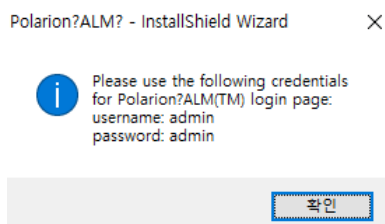

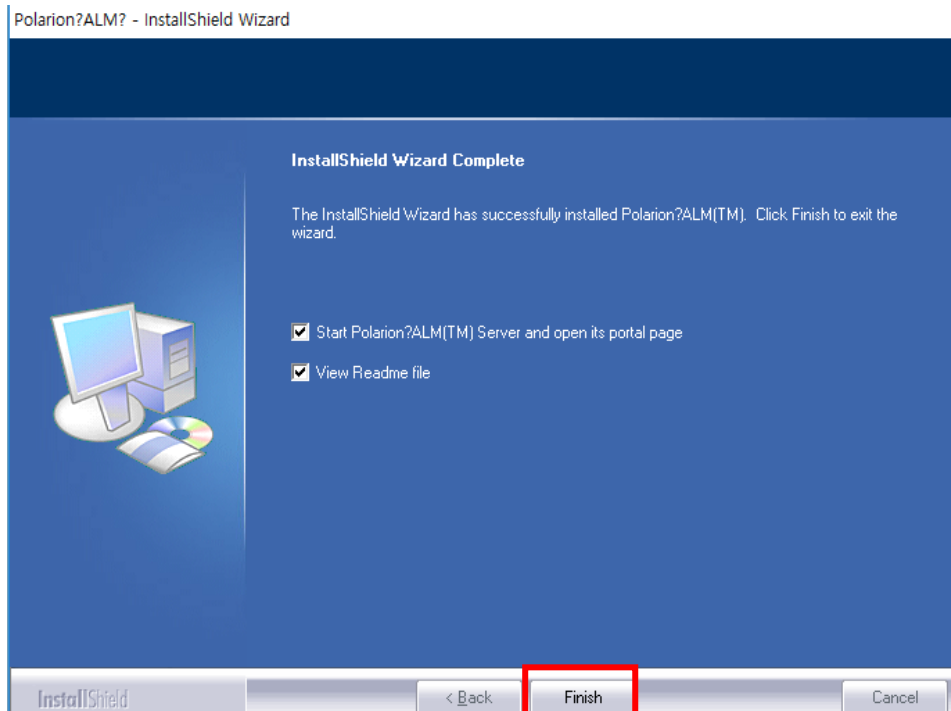

Domain: mydomain.com  
Host: desktop-6e93soh  
E-Mail: admin@mydomain.com

Install Apache as service Apache2Polarion  
Install Polarion?ALM(TM) as service Polarion  
Install PostgreSQL as service 'PostgreSQLPolarion'

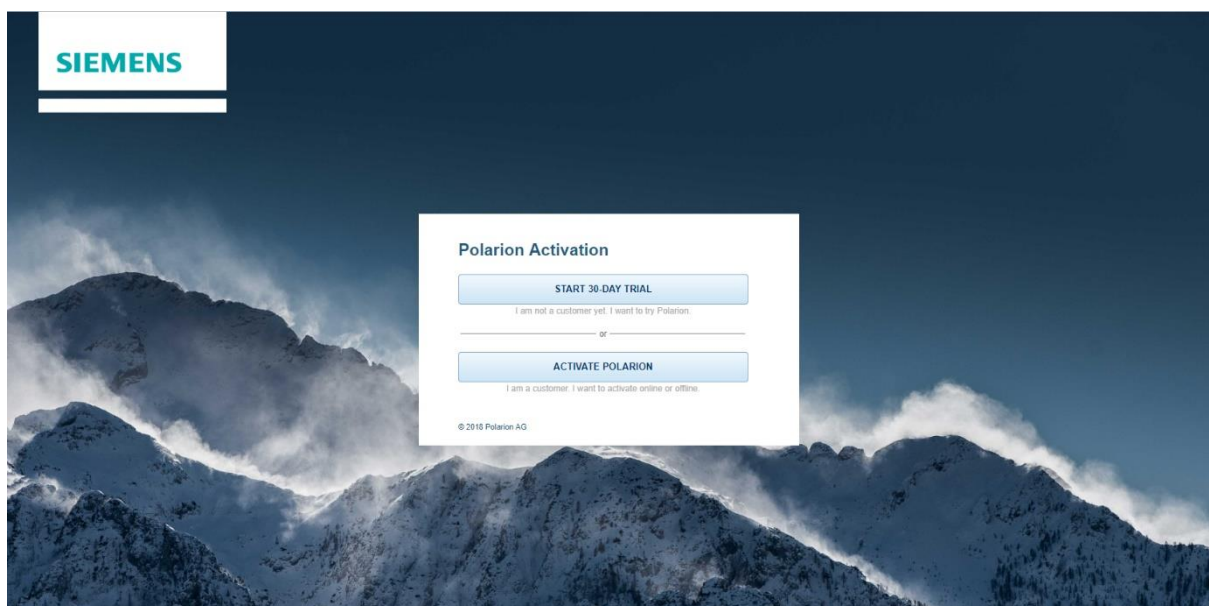

HTTP port: 80  
JK2 port: 8889  
PostgreSQL port: 5433  
Shutdown: 8887

SMTP host: mail.mydomain.com

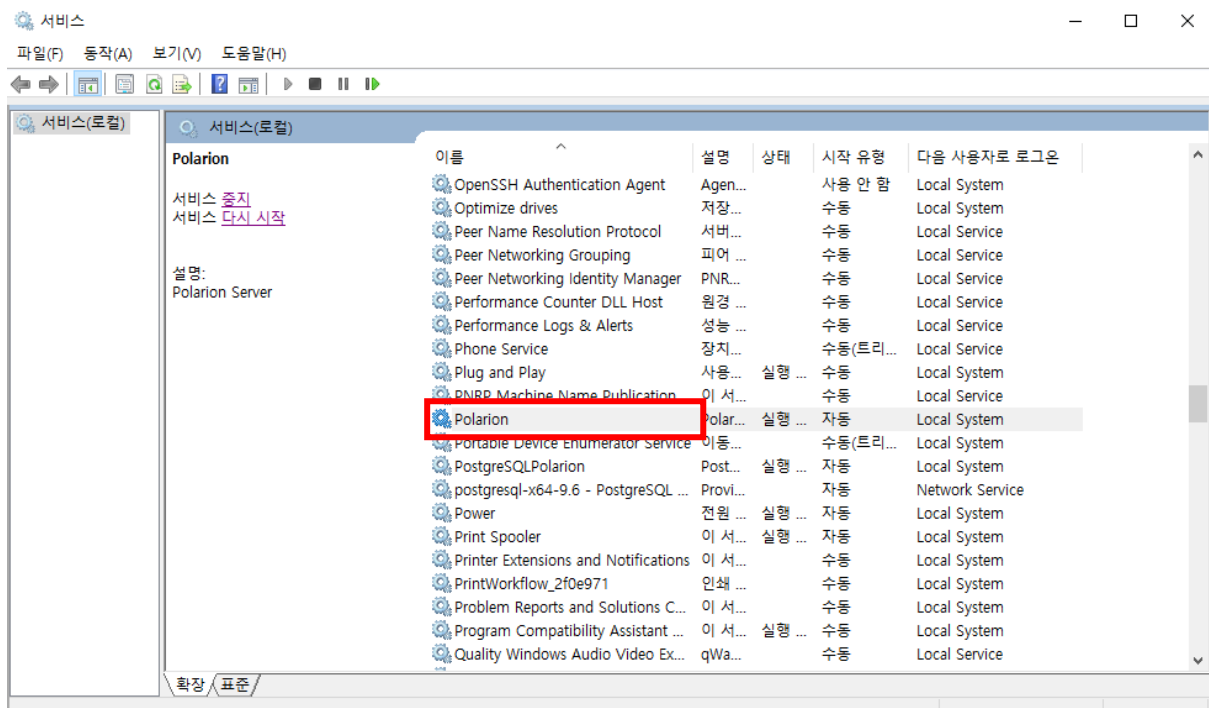

InstallShield

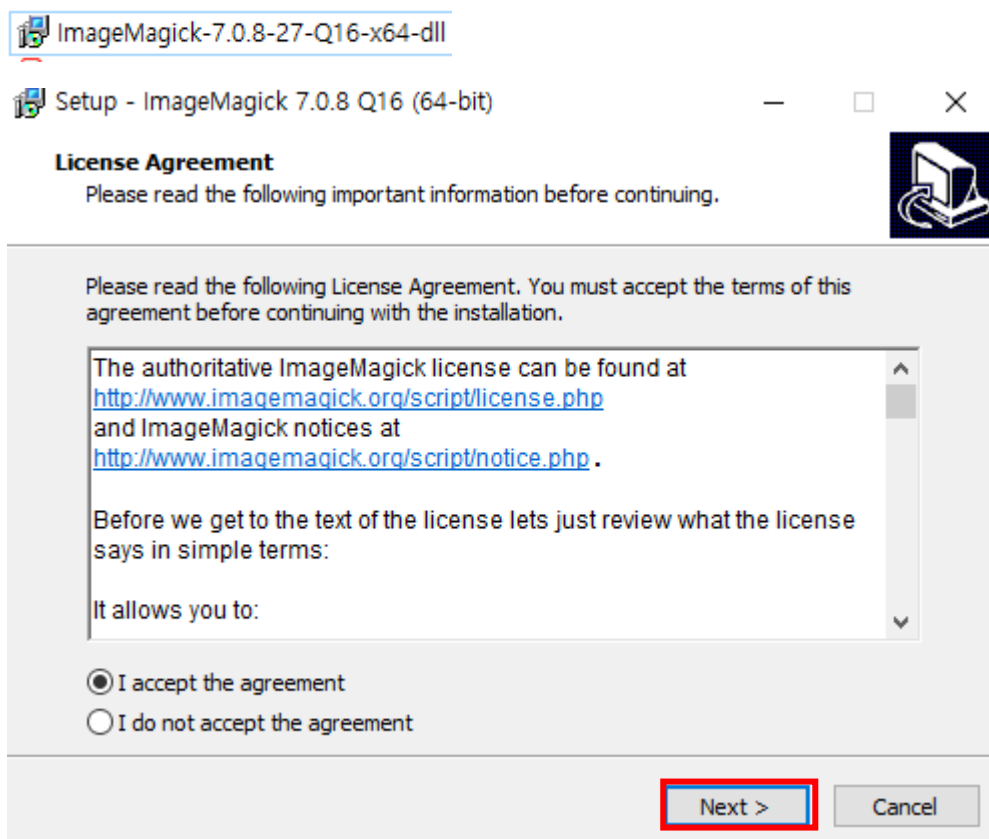

설치가 정상적으로 끝나면 username, password를 팝업으로 띄우고 페이지를 띄운다.

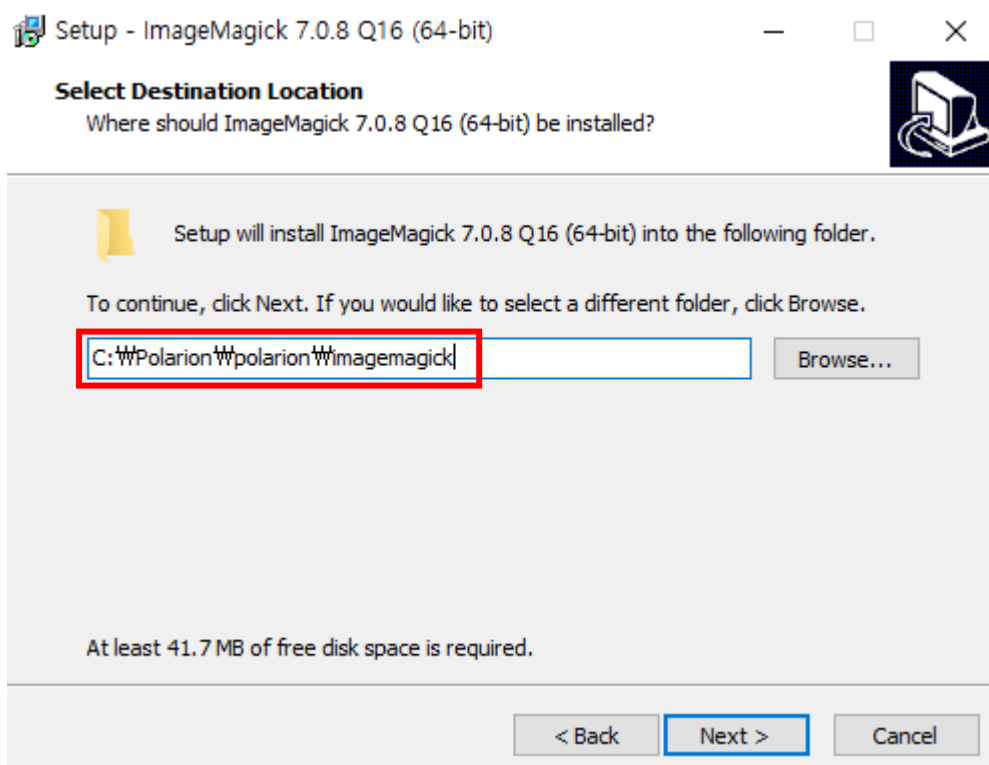

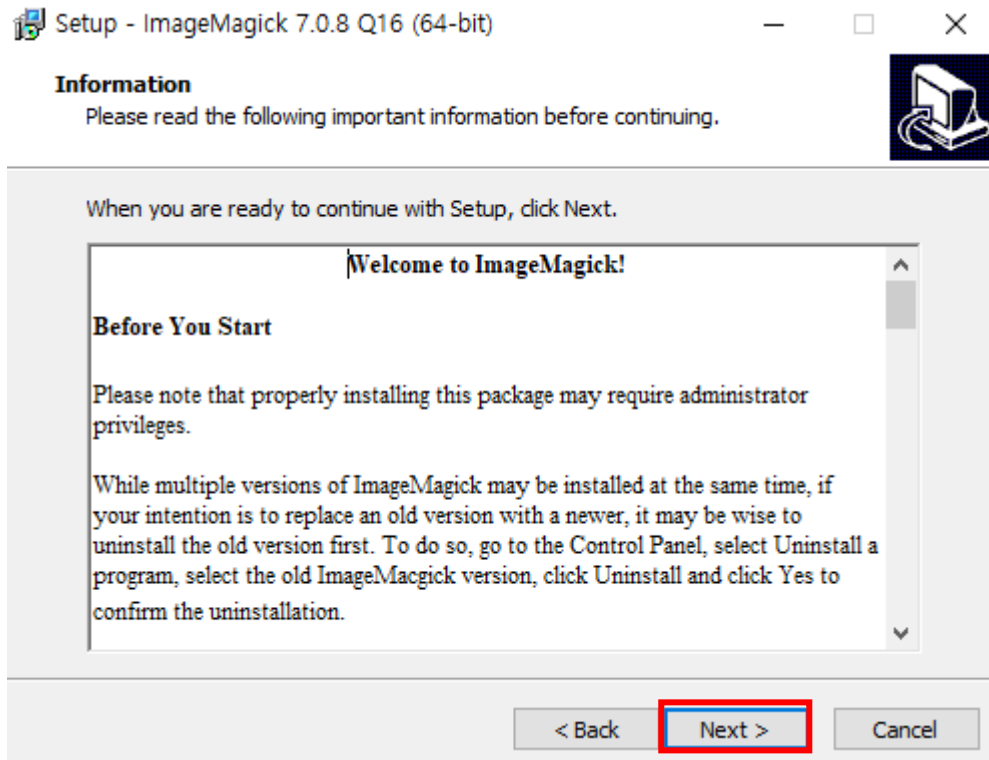

## 2. ImageMagick (oleconverter) 설치

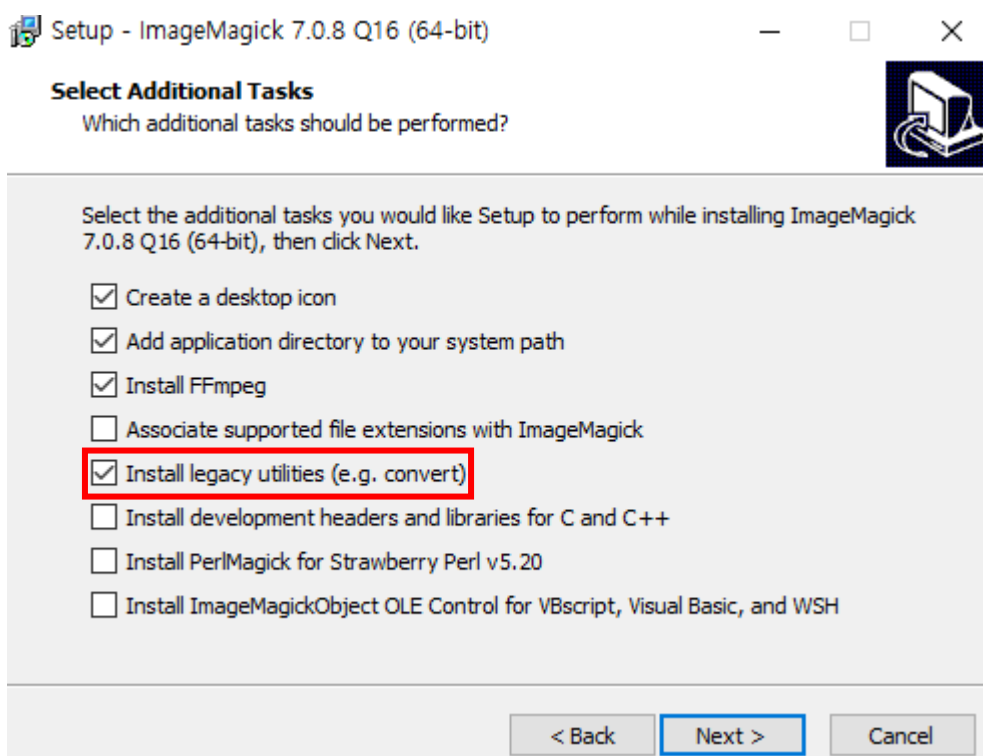

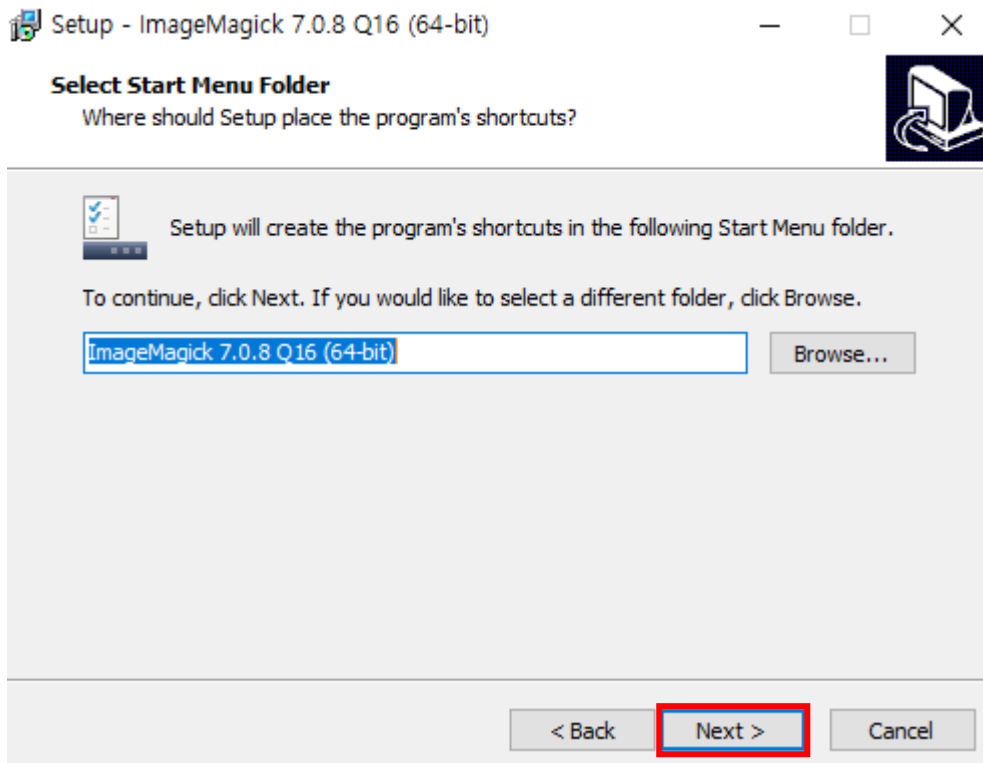

## Polarion 서비스 중지

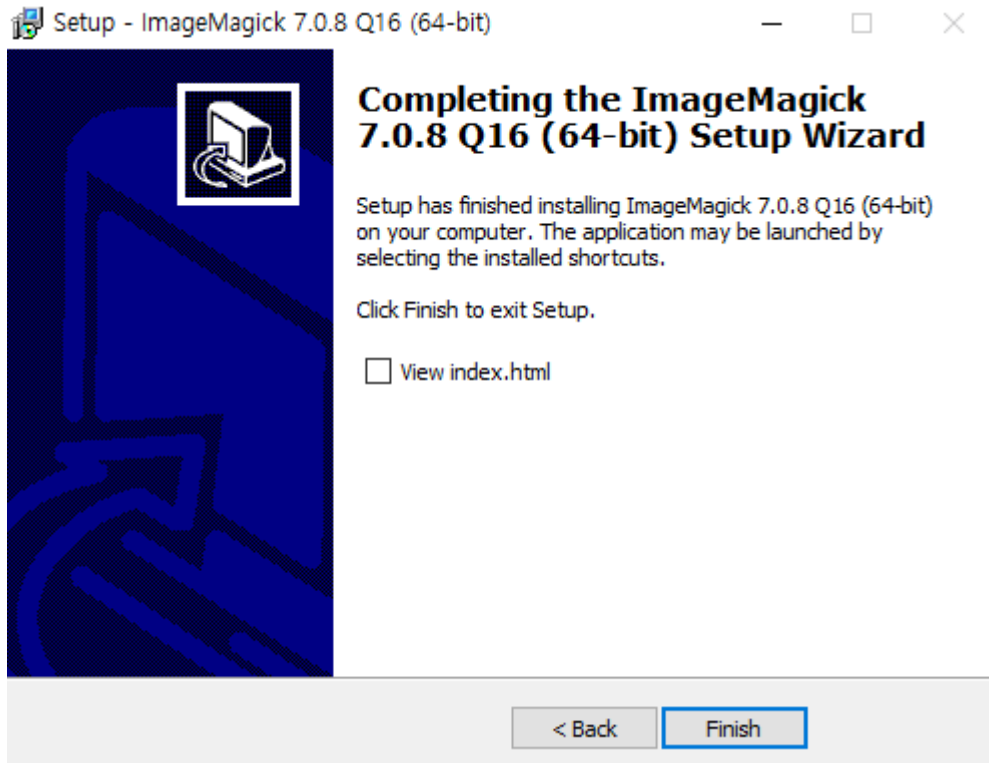

Polarion 설치된 경로에 imagemagick 경로로 변경하고 Next

Install legacy utilities를 체크

### 3. Polarion.properties 수정

C:\WPolarion\polarion\configuration

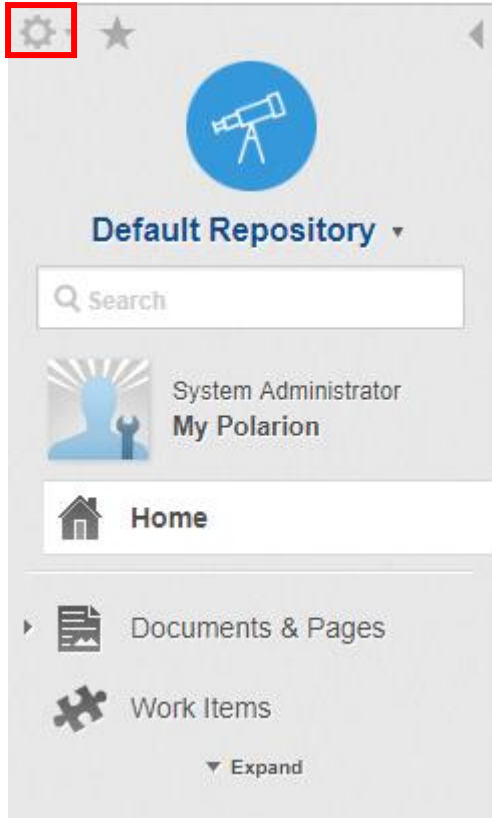

```
154 #com.polarion.oleconverter.app=${com.polarion.home}/imagemagick/convert.exe
155 #
156 # Configuration for ImageMagick on Linux platform
157 #com.polarion.oleconverter.app=convert
158 #
159 # Rest of configuration for ImageMagick on Windows and Linux platform
160 #com.polarion.oleconverter.usefiles=false
161 #com.polarion.oleconverter.param1=-flatten
162 #com.polarion.oleconverter.param2=-
163 #com.polarion.oleconverter.param3=png:-
164 #com.polarion.oleconverter.convertedImageFormat=png
```

```
154 com.polarion.oleconverter.app=${com.polarion.home}/imagemagick/convert.exe
155 #
156 # Configuration for ImageMagick on Linux platform
157 #com.polarion.oleconverter.app=convert
158 #
159 # Rest of configuration for ImageMagick on Windows and Linux platform
160 com.polarion.oleconverter.usefiles=false
161 com.polarion.oleconverter.param1=-flatten
162 com.polarion.oleconverter.param2=-
163 com.polarion.oleconverter.param3=png:-
164 com.polarion.oleconverter.convertedImageFormat=png
```

위 이미지와 같이 주석 스크립트를 풀어주고 저장합니다.

## 4. License 적용

License를 적용하기 위해서는 Online 상태여야 합니다.

기어 아이콘 클릭

'Administration' 클릭

'License' 클릭

## License Assignment and Usage

Reactivate Polarion

A screenshot of the 'Polarion Online Activation' page. The title 'Polarion Online Activation' is at the top. Below it is a 'License Key' label and an empty text input field. A note states: 'License Key is written in your Polarion License Agreement. Example: D12C-6EC4-98AF-AC698'. Below the input field is a large grey button labeled 'ACTIVATE POLARION'. At the bottom, there are links for 'Offline Activation' and 'Activation Help', and a copyright notice '© 2018 Polarion AG'.
